abundância

Lógica da Escassez

1. Acredito que não há recursos para todos

2. Medo: "Para que eu tenha, outros não terão."

3. Começo a competir por recursos e estocar o excedente.

4. Com menos recursos circulando, a escassez se auto-profetiza.

5. Vivemos num permanente estado de alerta e medo: "vai faltar".

6. O medo aumenta a posse, o estoque e a competição.

7. Um ciclo infinito.

Mensagem dos avós para nossos pais: “vai faltar”.

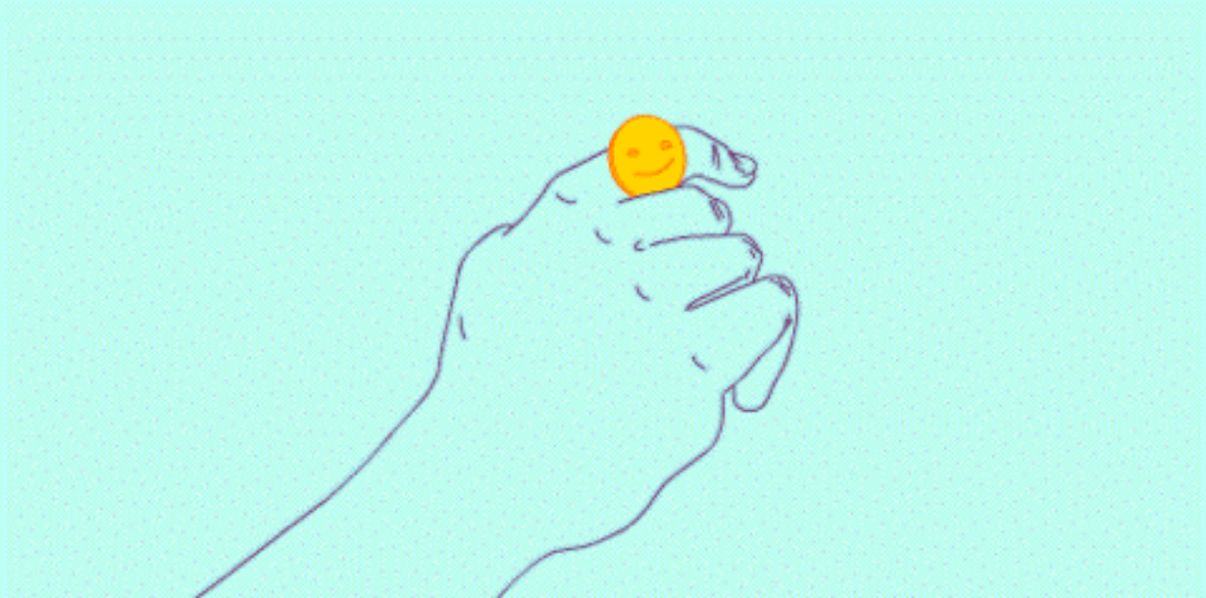

Amígdala: mais atenção às notícias de escassez.

“Há para todos.”

“Mesmo eu tendo, os outros também podem ter.”

“Não preciso competir.”

Lógica da Abundância

4. Coloco recursos próprios para circularem no sistema

5. Quem precisa, usa meus recursos que estão circulando

6. Se eu precisar, usarei recursos dos outros que também estão circulando

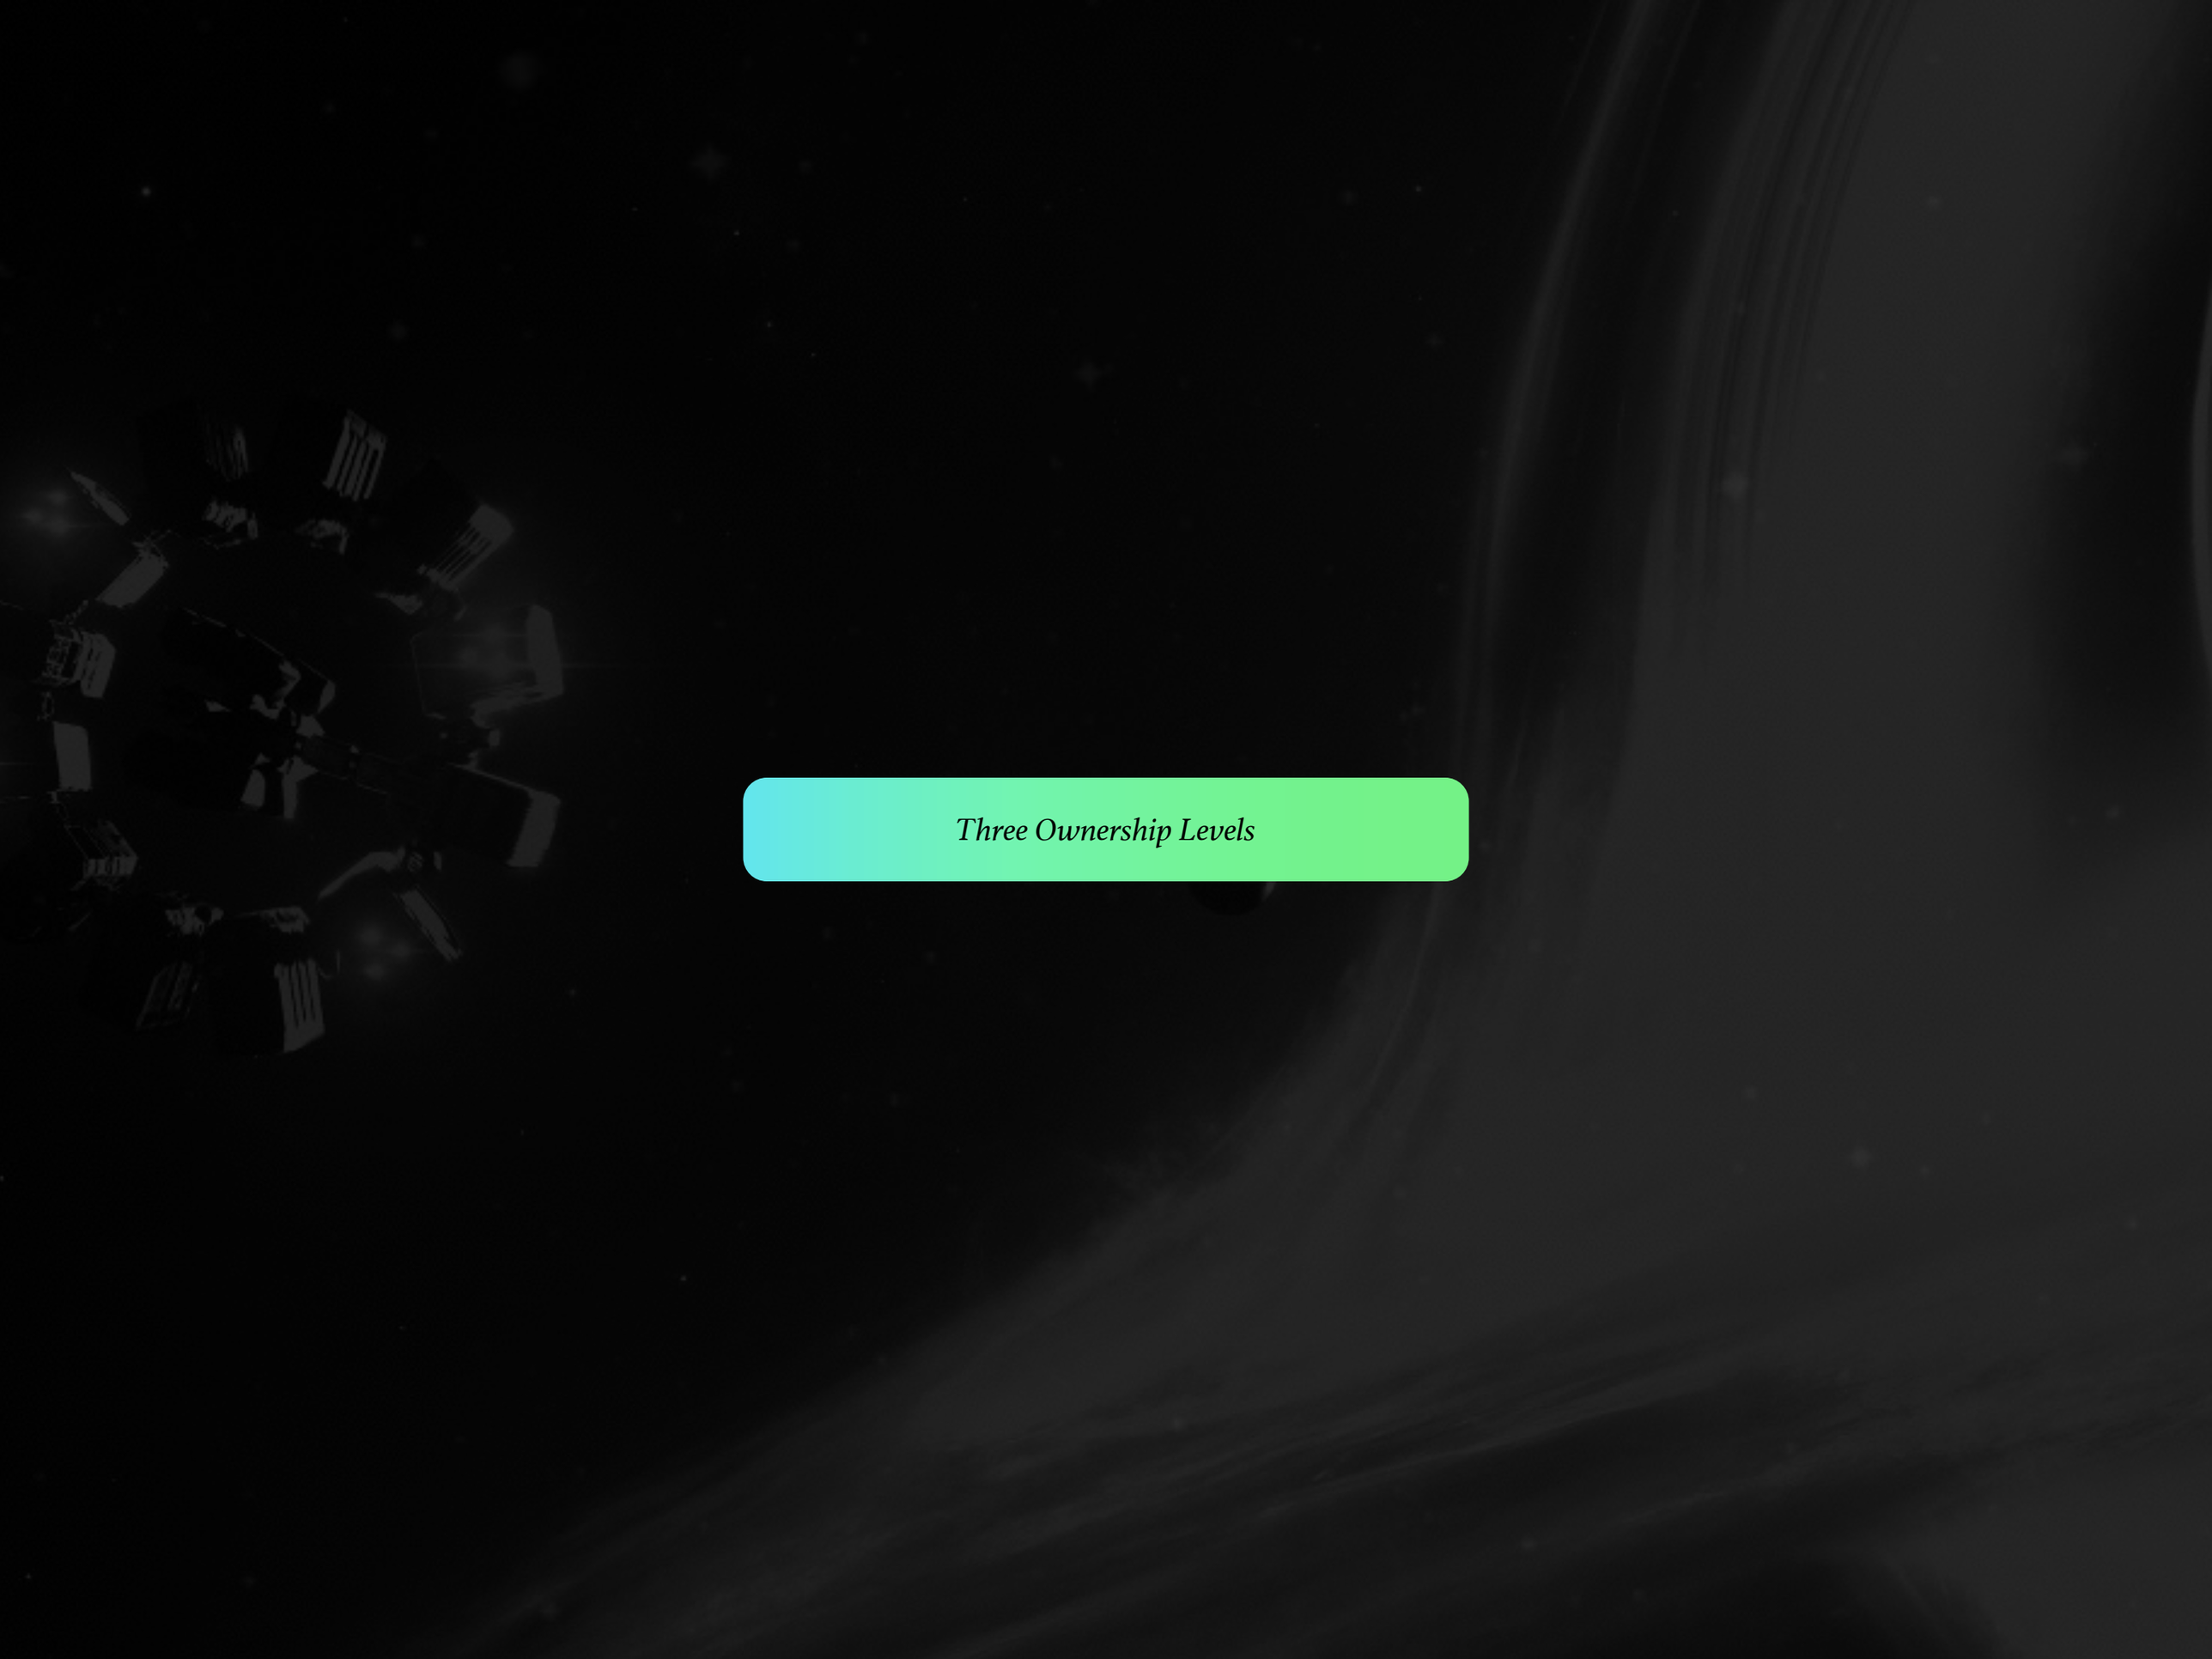

7. Com mais abundância, há mais confiança e o sistema cresce

1. Acredito que há recursos para todos

2. Enfrento o medo e dou espaço para a confiança

3. Paro de estocar recursos próprios

FACEBOOK LINKEDIN TWITTER EMAIL PRINT

The recent recession may have turned the job market on its head, but larger economic factors have drastically changed the U.S. market over the last century. The Industrial Revolution has all but eliminated once stable, middle-class jobs that were commonplace for your great-grandparents living in rural farmlands.

Finland to consider introducing universal basic income in 2017

'It would encourage people who are afraid of losing their benefits to take short-term jobs'

Serina Sandhu | Friday 1 April 2016 | 3 comments

India's Experiment in Basic Income Grants

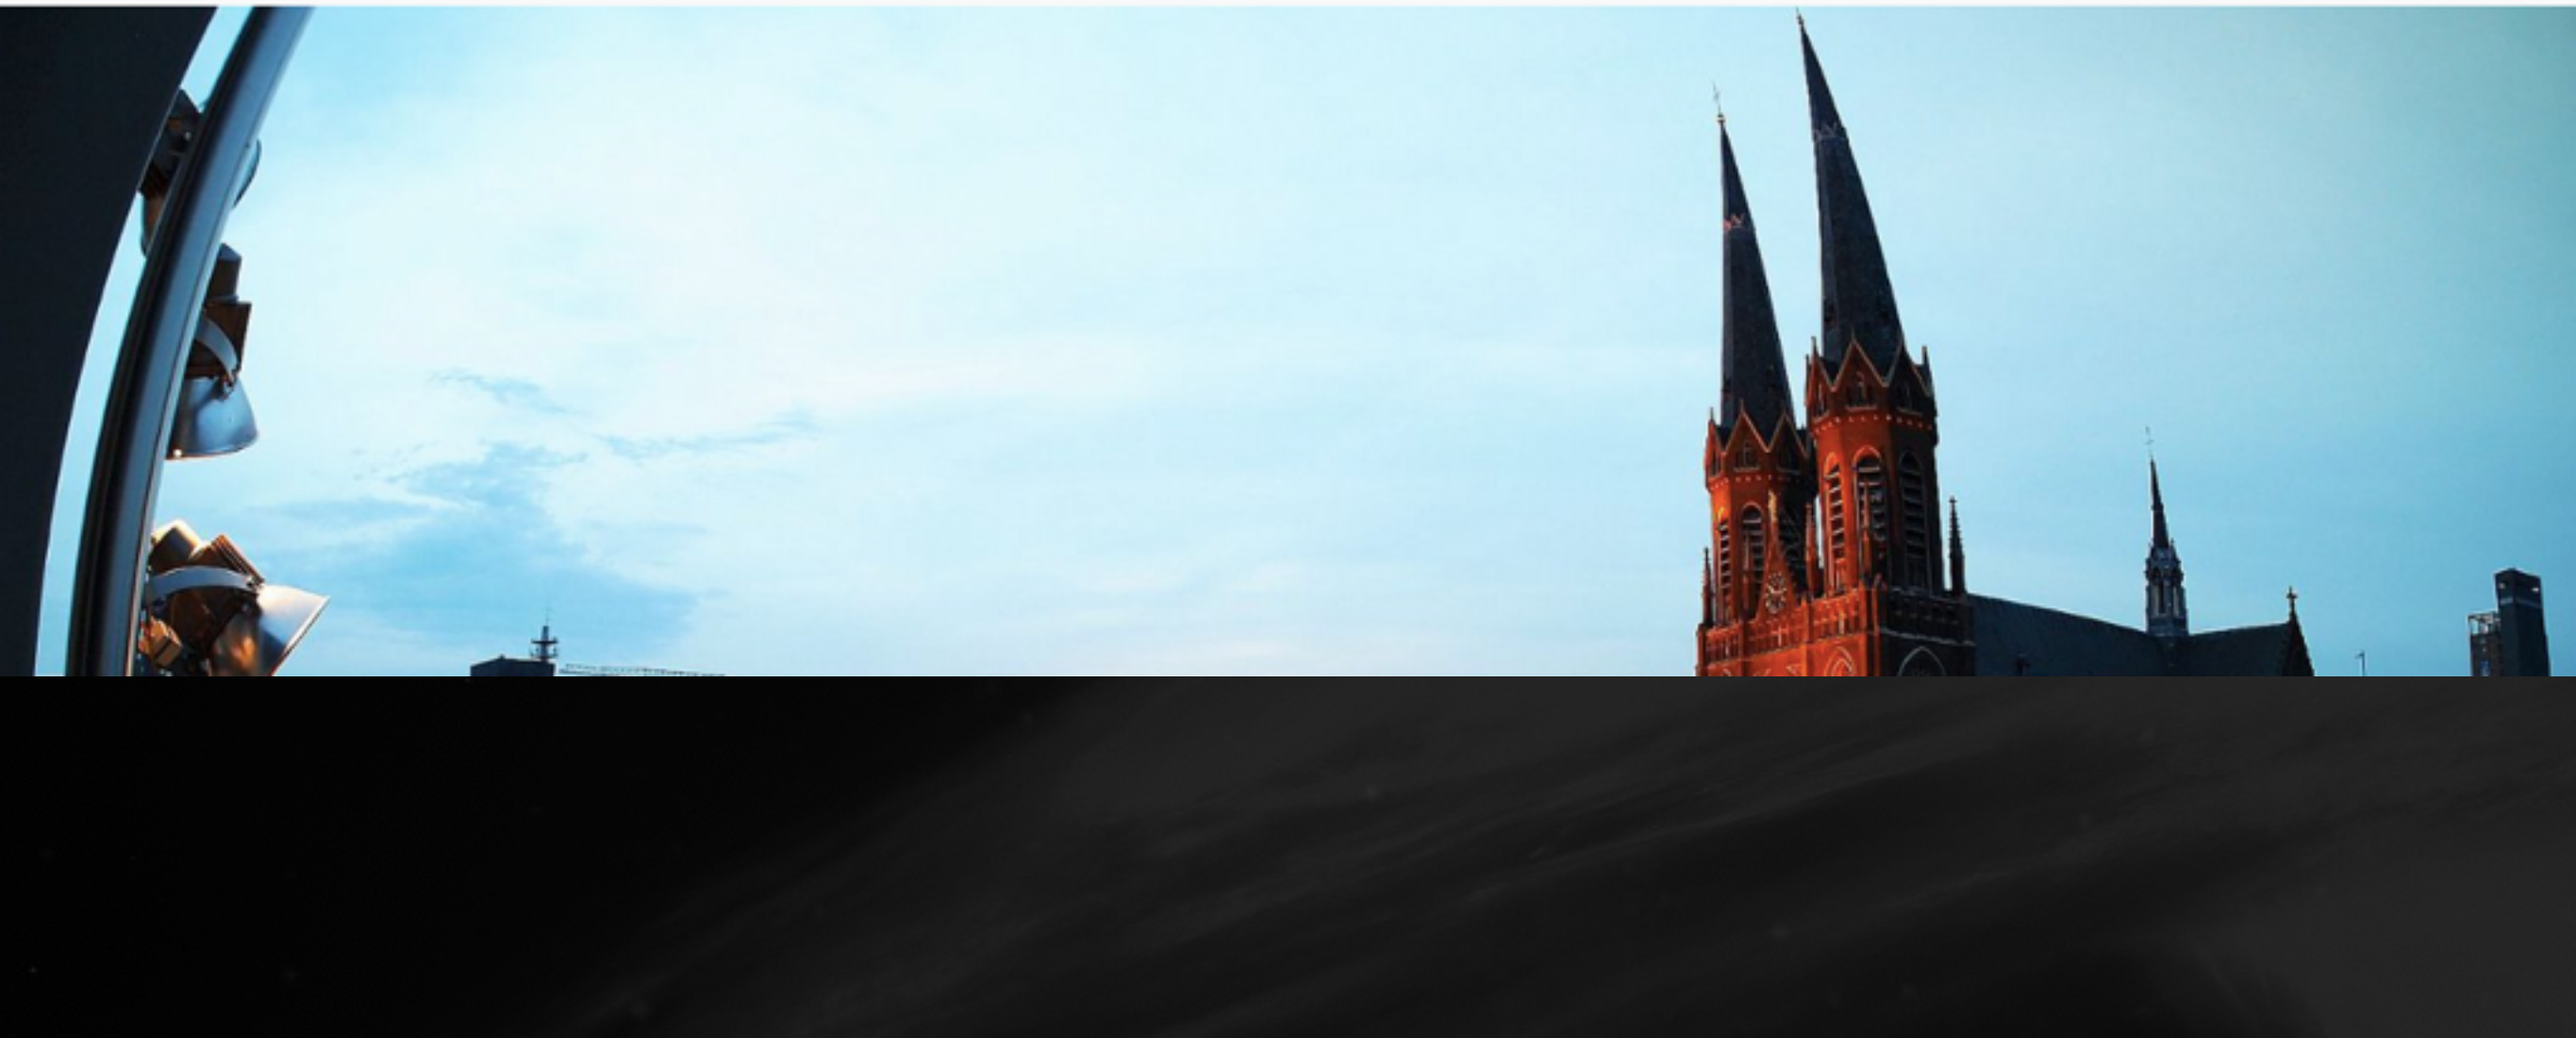

by Guy Standing, School of Oriental and African Studies, UK

Globalization has brought not just greater inequalities but also chronic economic uncertainty to the world's population. Governments have failed to effectively develop or adapt social protection systems to reduce economic insecurity. They have turned to means-testing, behavior-testing, selectivity, targeting, conditionality, and workfare. Emancipatory universalism has been sacrificed everywhere.

In that context, there has been renewed interest in universal unconditional basic income grants, namely cash transfers given to all citizens to ensure that they have a minimal income. While conditional cash transfers have become popular all over the world, the unconditional universal alternative has not been adequately considered. I joined SEWA (Self-Employed Women's Association) in a project funded by UNICEF to launch pilot studies of the effectiveness of such universal income grants in India.

Switzerland Will Hold The World's First Universal Basic Income Referendum

What if everyone got a guaranteed $2,500 check every month? How would society change?

SWITZERLAND: Basic Income would cost only 25 billion, government report shows

April 4, 2016 Kate McFarland News, News & events

Swiss government has released a new report showing the implementation of a basic income in Switzerland would cost far less than it had previously anticipated.

On March 11th, the Swiss Ministry of Social Security released a new calculation of the cost of a universal basic income. According to the latest estimates, a UBI would cost the country only 25 billion Swiss francs. This is substantial revision from previous estimates, which had put the cost as high as 154 billion Swiss francs.

The revised calculation will likely increase the appeal of a UBI as the country approaches a referendum election on June 5th, in which a basic income is one of five propositions that will be voted on.

According to the basic income proponents in Switzerland, the introduction of a basic income would only cost 2 billion francs.

NEW ZEALAND: Labour Party considers Universal Basic Income

April 1, 2016 Andre Coelho News, News & events

Andrew Little at WelTec. Credit to: Stuff.co.nz.

Following the lead of countries like Finland, Netherlands and Canada, New Zealand is now making its first steps towards a basic income. In a recent Stuff news article, Andrew Little, leader of the Labour Party, the second largest party in the New Zealand's parliament, says Labour is considering a basic income. This interest is mainly motivated by the rise in structural unemployment, which guarantees profound changes in how New Zealanders work. Automation and precariousness of employment, self-employment and new business models are all affecting the way people work, and these structural changes occupy a central place in present day Labour Party concerns.

Grupos de trabalho fluidos

Num futuro próximo, não haverá empresas. Pelo menos, não como elas são hoje. Seremos todos freelancers/autônomos/profissionais liberais. Você poderá exercer a atividade que bem entender. Num dia será decorador, no outro músico, e, na semana seguinte, professor de jiu-jitsu.

Tudo vai depender do seu interesse, da sua capacidade e da boa e velha lei de mercado.

Para isso, os reguladores de hoje (diplomas e titulações) serão ainda mais fluidos, permitindo que você literalmente exerça milhares de atividades profissionais ao longo da vida.

Inclusive, essa é outra diferença. Não haverá profissões (condição estática), apenas atividades (condição fluida).

As empresas (estáticas) darão lugar a grupos de trabalho (fluidos), que se reunirão ao redor de propósitos comuns.

Eles durarão o tempo que fizer sentido para os participantes. E não o tempo que fizer sentido nos contratos e nas suas respectivas legislações.

Não haverá chefe. As lideranças serão circunstanciais e rotativas, nunca fixas.
Portanto, não haverá cargos (estáticos) mas funções momentâneas (fluidas).

O propósito e o legado serão os líderes invisíveis.

Todos os envolvidos serão sócios e entrarão em acordo preliminar para definir suas responsabilidades — e, por consequência, suas percentagens.

Será o fim das jornadas de trabalho de oito horas (estáticas) para uma auto-organização no formato que melhor servir ao grupo (fluido).

Seguindo os princípios da abundância, haverá um senso de concorrência muito diferente do que há hoje. A colaboração estará introjetada em todos nós e o prazer no trabalho será uma consequência natural.

As pessoas terão liberdade de abandonar o projeto no momento que desejarem, sem complicações com a lei, avisos prévios ou quaisquer outras burocracias.

E isso se aplicará a todos os quadrantes da sociedade, passando pela iniciativa privada, mas também pela esfera pública e pelas ONGs.

O sistema será dinâmico, criando muito mais oportunidades do que hoje — e permitindo que você experimente quantas atividades tiver vontade.

Todos nós teremos ainda mais liberdade e oportunidades para ir e vir.

E, apenas assim, cada indivíduo poderá realizar aquilo que lhe faz verdadeiramente feliz.

Esse cenário, que para alguns parece utópico, está mais perto do que parece. Em alguns ambientes, isso inclusive, já é realidade.

PORTANTO, TODOS SEREMOS EMPREENDEDORES.

Mas a liberdade tem um preço. Teremos que nos acostumar com um novo tipo de organização, muito menos paternalista que temos hoje.

Um sistema mais horizontal exige que todos tenham postura de dono.

Atuais funcionários terão que despertar a autogestão, capaz de realizar tarefas sem cobrança exterior.

Gerentes e diretores terão que aprender a trabalhar sem hierarquia, em organismos onde todos percebem-se empoderados.

Empreendedores têm o dever de derreter suas atuais estruturas empresariais em favor de modelos distribuídos. Mas, principalmente: têm o dever de compartilhar a sua consciência empreendedora — a capacidade de realizar — com aqueles que ainda não a possuem.

Essa é uma missão de todos.

Como disse o Prêmio Nobel Muhammad Yunus: *todos somos empreendedores, mas muitos de nós ainda não tiveram a oportunidade de descobrir.*

O CONCEITO DE EMPREENDEDOR.

Empreendedor não significa, necessariamente, abrir uma empresa.
Empreendedor é aquele que não aceita a realidade de maneira resignada.
Motivado pelo desejo de mudança para gerar impacto positivo no mundo, ele ajuda a co-construir uma iniciativa.

O que é, como vai ser e o porquê da existência dessa iniciativa, só o empreendedor poderá dizer.

Minha definição de empreendedor é simples:

O indivíduo que tem consciência do seu empoderamento — por isso, assume com autonomia o rumo da sua vida e constrói iniciativas que mudem a realidade para melhor.

Sobre empoderamento: todos nós já estamos empoderados. A questão é que, infelizmente, muitos ainda enxergam um mundo hierarquizado, onde uns valem mais do que os outros.

Sobre autonomia: de Kant a Piaget, a palavra *autonomia* sempre é recorrente entre os grandes pensadores. A melhor definição que consegui foi: *autonomia é a capacidade de governar a si mesmo, numa escolha racional e emocional, com decisões conscientes e sabedoras das suas imediatas consequências, não determinadas por influências invisíveis como o medo, a pressão social ou a conformidade*.

Portanto, o empreendedor é a pessoa que possui recursos emocionais suficientes para tomar as decisões pela sua própria cabeça. E viver de forma plena, como ser humano consciente e capaz de se fazer feliz.

Sobre construir uma iniciativa: ela não precisa ser, necessariamente, profissional. Pode ser uma ONG que luta contra a fome, uma associação de pais que pretendem educar os próprios filhos, um grupo de estudos de filosofia — ou até coisas menos pretensiosas.

Mais importante do que a iniciativa é o *construir* — é o *fazer* –, e não aceitar de forma indiferente o mundo como ele é.

Entretanto, quando atingirmos um mundo horizontal, o simples fato de participar de iniciativas profissionais já significará co-construí-las.

Ou seja: quando há ausência de hierarquia e todos são sócios, o simples fato de participar de um novo projeto já nos tornará automaticamente empreendedores.

Sobre mudar a realidade para melhor: a alienação pode fazer o ser humano insensível. Mas ao trazermos o indivíduo para um nível de consciência avançado, ele retoma à sua natureza generosa.

A verdadeira essência do empreendedorismo é a bondade.

The Power of Ideas

"Just as the biosphere stands above the world of nonliving matter, so an 'abstract kingdom' rises above the biosphere. The denizens of this kingdom? Ideas"

- James Gleick

Assim como a biosfera está acima do mundo da matéria inanimada,
um "reino abstrato" se eleva acima da biosfera. Os habitantes deste reino? Ideias

AEROLI.TO

Será que não estamos defendendo um modelo de que, daqui a alguns anos, vamos nos envergonhar, pela sua natureza controladora?

Será que não é hora de pensarmos em novas possibilidades?

Enquanto estivermos imersos em certezas, enquanto não considerarmos novas alternativas, continuaremos fazendo tudo como sempre foi.

Este livro é um convite a uma reflexão. Um convite a uma nova forma de enxergar a autonomia do ser humano, e — consequentemente — o empreendedorismo, a gestão e a vida profissional.

Este livro é um convite a experimentarmos um novo formato de trabalho.

Certamente para alguns soará absurdo.

Mas prefiro sempre ser o absurdo de hoje do que o absurdo do amanhã.

O FUTURO DAS EMPRESAS.

A Revolução Digital nos fez despertar para uma nova consciência em todos os níveis da sociedade. Como não poderia deixar de ser, também afetou sensivelmente a consciência dos dois lados do balcão: tanto de empregados quanto dos empregadores.

Estamos diante de um efeito dominó que nos levará para a mudança mais radical na história do trabalho.

Num futuro próximo, não haverá empresas. Pelo menos, não como elas são hoje. Seremos todos freelancers/autônomos/profissionais liberais. Você poderá exercer a atividade que bem entender. Num dia será decorador, no outro músico, e, na semana seguinte, professor de jiu-jitsu.

Tudo vai depender do seu interesse, da sua capacidade e da boa e velha lei de mercado.

Para isso, os reguladores de hoje (diplomas e titulações) serão ainda mais fluidos, permitindo que você literalmente exerça milhares de atividades profissionais ao longo da vida.

Inclusive, essa é outra diferença. Não haverá profissões (condição estática), apenas atividades (condição fluida).

As empresas (estáticas) darão lugar a grupos de trabalho (fluidos), que se reunirão ao redor de propósitos comuns.

Eles durarão o tempo que fizer sentido para os participantes. E não o tempo que fizer sentido nos contratos e nas suas respectivas legislações.

Não haverá chefe ou contratante. As lideranças serão circunstanciais e rotativas, nunca fixas. Portanto, não haverá cargos (estáticos) mas funções momentâneas (fluidas).

O propósito e o legado serão os líderes invisíveis.

Todos os envolvidos serão sócios e entrarão em acordo preliminar para definir suas responsabilidades — e, por consequência, suas percentagens.

Será o fim das jornadas de trabalho de oito horas (estáticas) para uma auto-organização no formato que melhor servir ao grupo (fluido).

Seguindo os princípios da abundância, haverá um senso de concorrência muito diferente do que há hoje. A colaboração estará introjetada em todos nós e o prazer no trabalho será uma consequência natural.

As pessoas terão liberdade de abandonar o projeto no momento que desejarem, sem complicações com a lei, avisos prévios ou quaisquer outras burocracias.

Sobre mudar a realidade para melhor: a alienação pode fazer o ser humano insensível. Mas ao trazermos o indivíduo para um nível de consciência avançado, ele retoma à sua natureza generosa.

A verdadeira essência do empreendedorismo é a bondade.

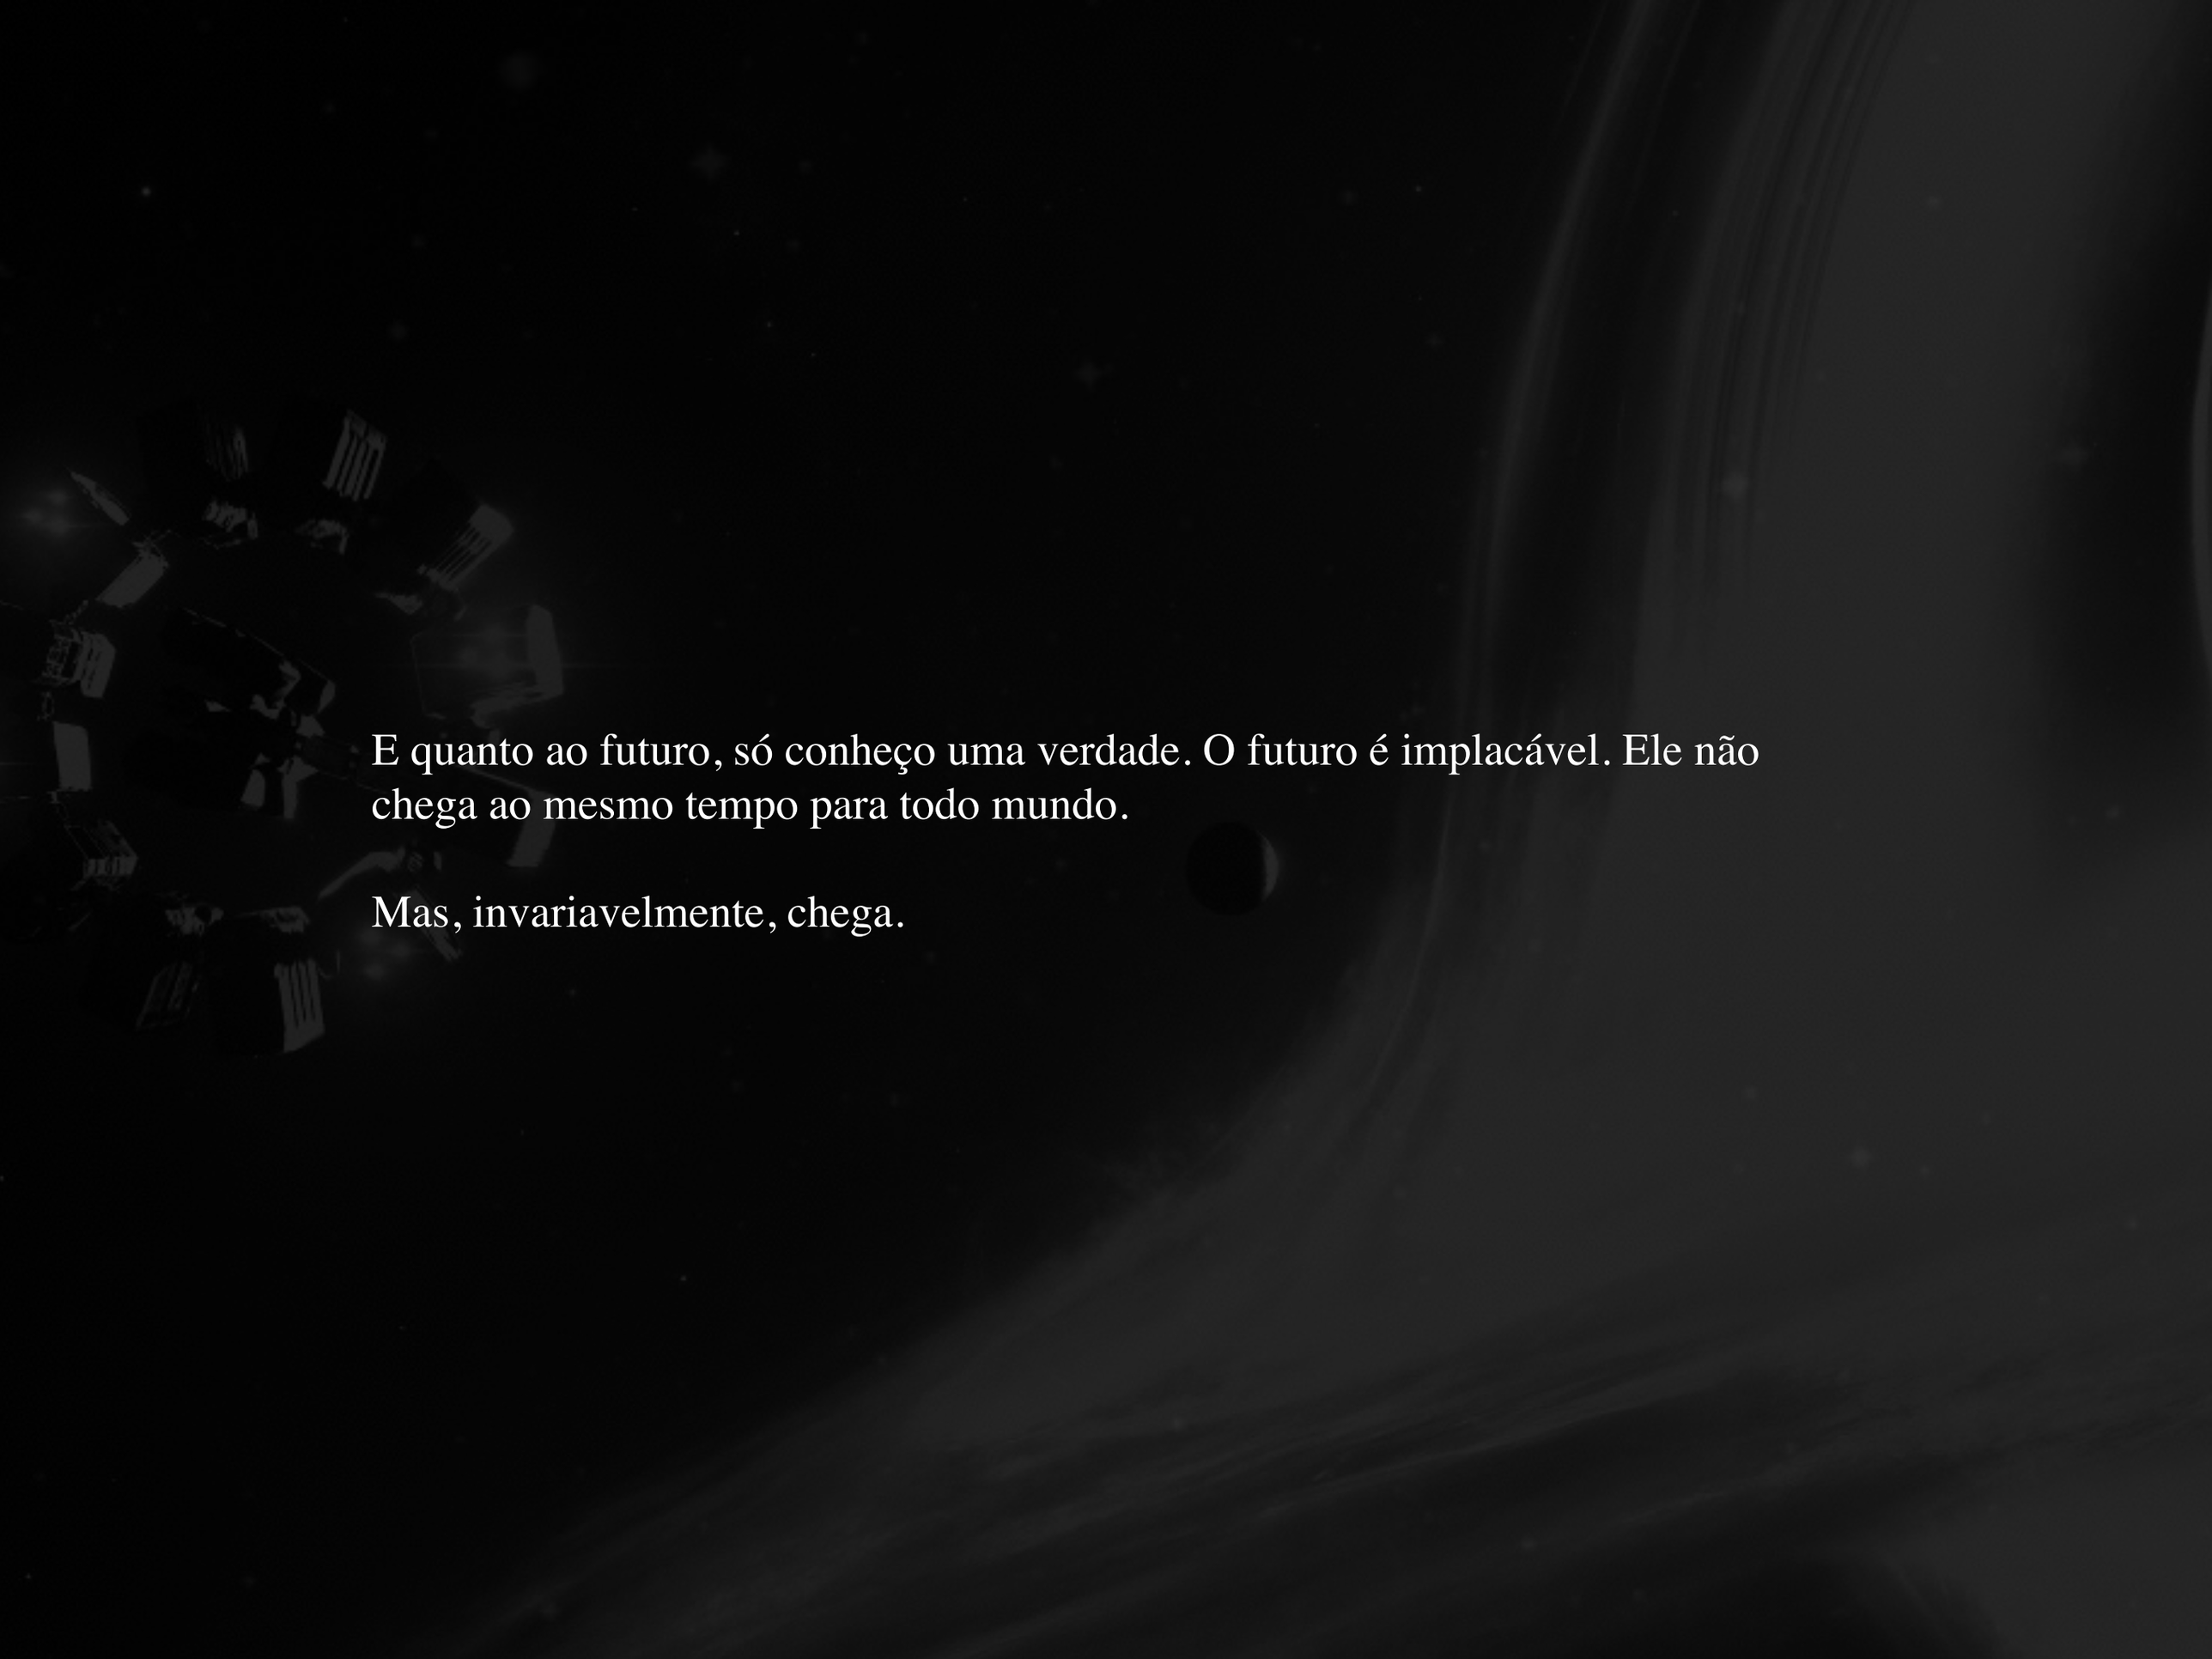

DESAFIOS.

Evidente que há muitos desafios para chegarmos lá. As desigualdades que existem na nossa sociedade não nos permitem imaginar uma transição no curto prazo.

Entretanto, como bom otimista, acredito na espécie humana. Somos hábeis em resolver problemas. Foi assim sempre e assim sempre será.

As evoluções tecnológicas dos últimos cem anos, que permitiram uma maior qualidade de vida da população em níveis universais, são um fenômeno sem precedentes.

Portanto, se de um lado existe receio, de outro existe esperança.

E quanto ao futuro, só conheço uma verdade. O futuro é implacável. Ele não chega ao mesmo tempo para todo mundo.

Mas, invariavelmente, chega.

Médio prazo – transformação social:
quanto mais para a direita,
mais horizontal, transparente
e distribuída é a sociedade.

Unemployed

Lógica da Abundância

4. Coloco recursos próprios para circularem no sistema

5. Quem precisa, usa meus recursos que estão circulando

6. Se eu precisar, usarei recursos dos outros que também estão circulando

7. Com mais abundância, há mais confiança e o sistema cresce

1. Acredito que há recursos para todos

2. Enfrento o medo e dou espaço para a confiança

3. Paro de estocar recursos próprios

Finland to consider introducing universal basic income in 2017

'It would encourage people who are afraid of losing their benefits to take short-term jobs'

India's Experiment in Basic Income Grants

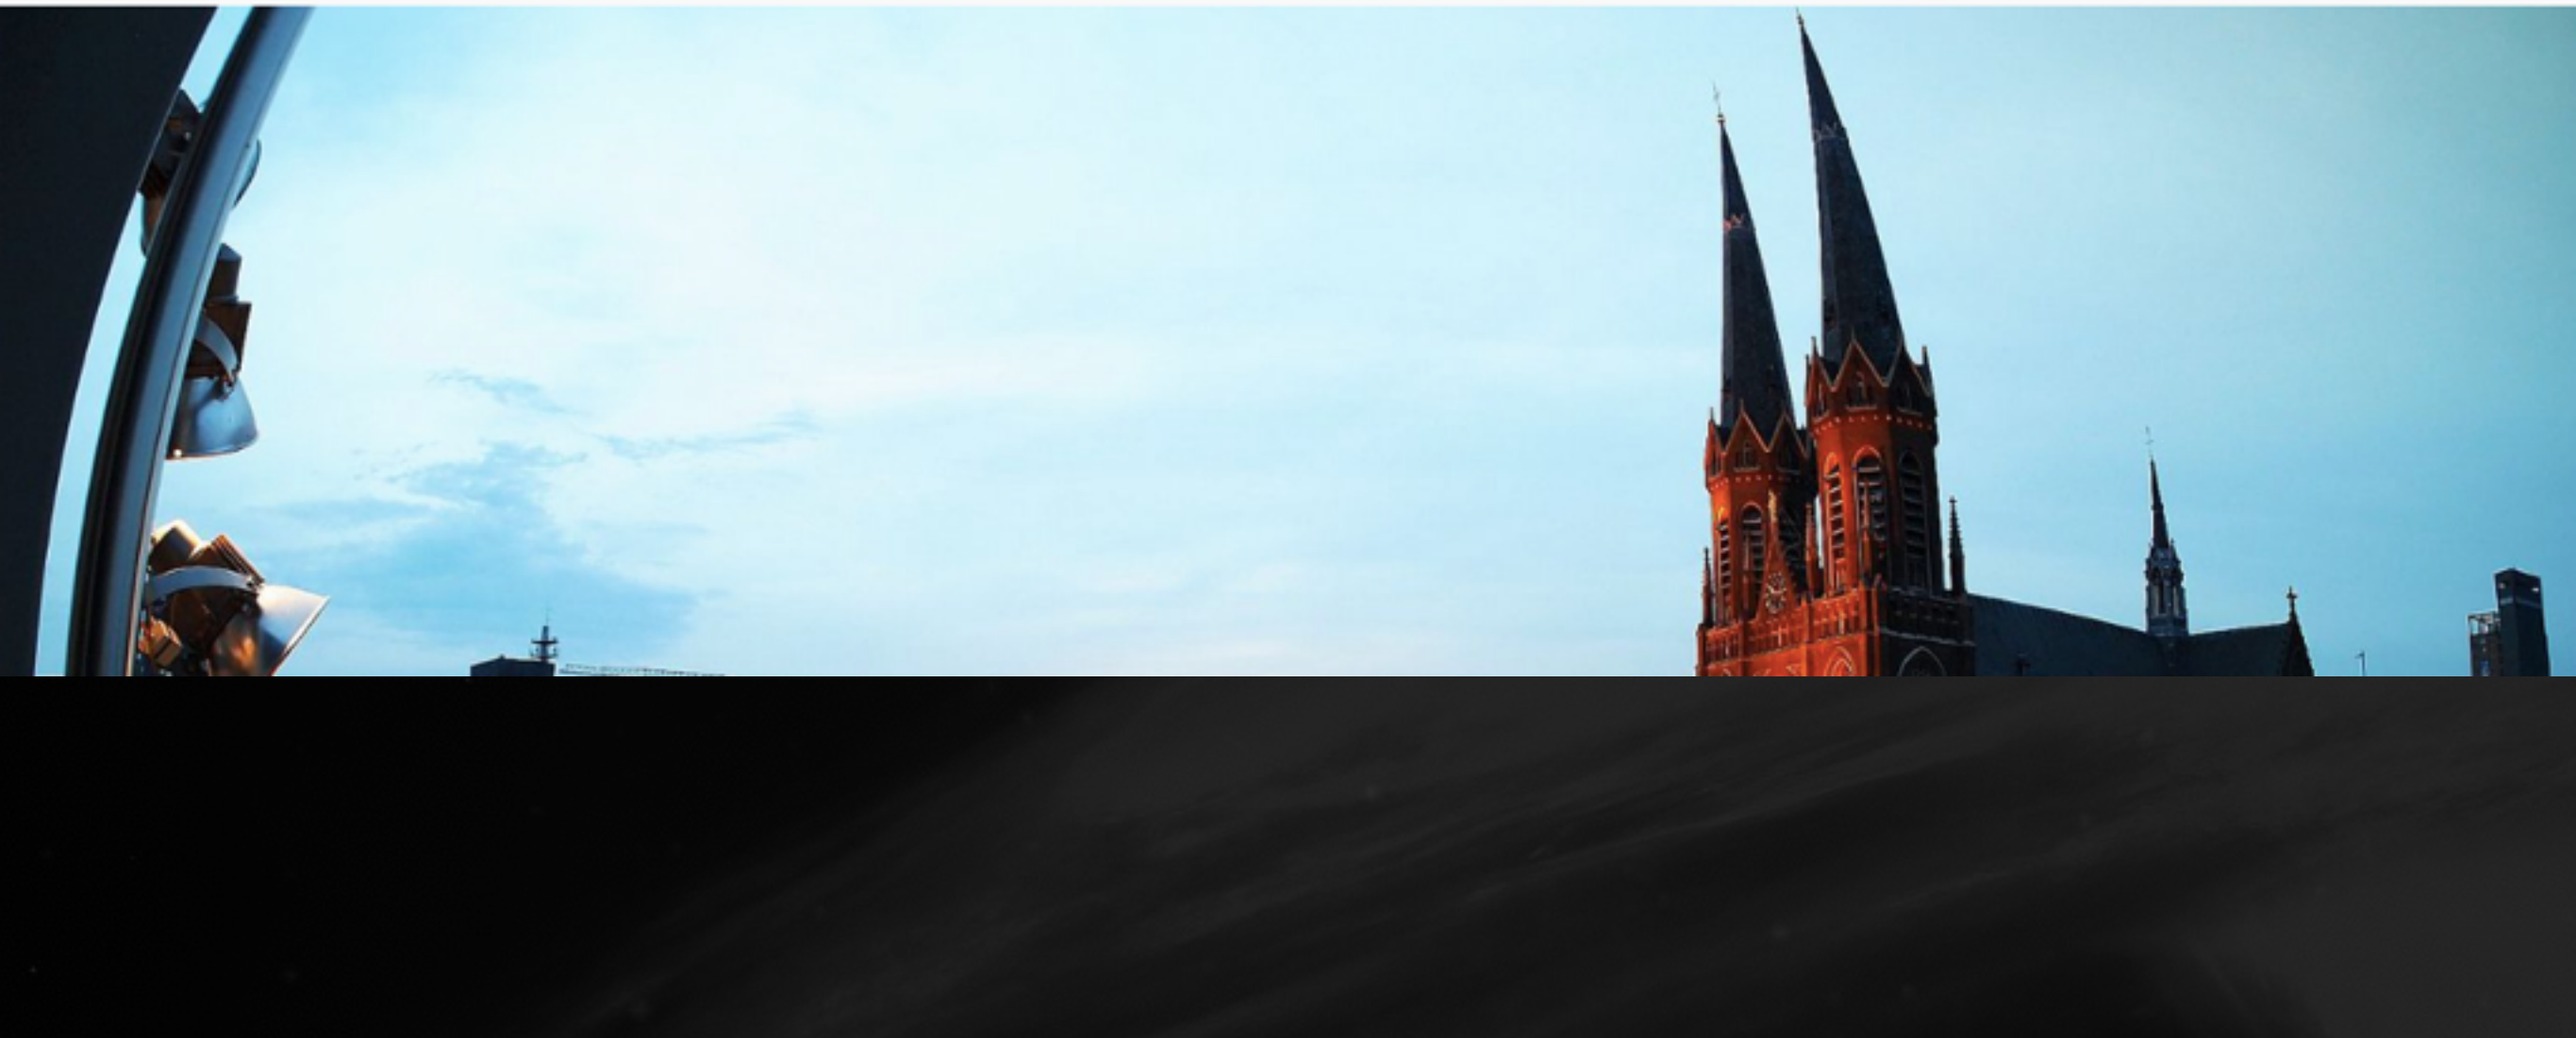

by Guy Standing, School of Oriental and African Studies, UK

Globalization has brought not just greater inequalities but also chronic economic uncertainty to the world's population. Governments have failed to effectively develop or adapt social protection systems to reduce economic insecurity. They have turned to means-testing, behavior-testing, selectivity, targeting, conditionality, and workfare. Emancipatory universalism has been sacrificed everywhere.

In that context, there has been renewed interest in universal unconditional basic income grants, namely cash transfers given to all citizens to ensure that they have a minimal income. While conditional cash transfers have become popular all over the world, the unconditional universal alternative has not been adequately considered. I joined SEWA (Self-Employed Women's Association) in a project funded by UNICEF to launch pilot studies of the effectiveness of such universal income grants in India.

Switzerland Will Hold The World's First Universal Basic Income Referendum

What if everyone got a guaranteed $2,500 check every month? How would society change?

SWITZERLAND: Basic Income would cost only 25 billion, government report shows

April 4, 2016 Kate McFarland News, News & events

Swiss government has released a new report showing the implementation of a basic income in Switzerland would cost far less than it had previously anticipated.

On March 11th, the Swiss Ministry of Social Security released a new calculation of the cost of a universal basic income. According to the latest estimates, a UBI would cost the country only 25 billion Swiss francs. This is substantial revision from previous estimates, which had put the cost as high as 154 billion Swiss francs.

The revised calculation will likely increase the appeal of a UBI as the country approaches a referendum election on June 5th, in which a basic income is one of five propositions that will be voted on.

According to the basic income proponents in Switzerland, the introduction of a basic income would only cost 2 billion francs.

NEW ZEALAND: Labour Party considers Universal Basic Income

April 1, 2016 Andre Coelho News, News & events

Andrew Little at WelTec. Credit to: Stuff.co.nz.

Following the lead of countries like Finland, Netherlands and Canada, New Zealand is now making its first steps towards a basic income. In a recent Stuff news article, Andrew Little, leader of the Labour Party, the second largest party in the New Zealand's parliament, says Labour is considering a basic income. This interest is mainly motivated by the rise in structural unemployment, which guarantees profound changes in how New Zealanders work. Automation and precariousness of employment, self-employment and new business models are all affecting the way people work, and these structural changes occupy a central place in present day Labour Party concerns.

THE SOCIALIZER

is **visionary** and good at making connections

She's the first leader but,

needs to be **self-aware**

everything she says and does is oberved

→ strong impact on group culture

the growth of the community depends almost entirely on *her ability to get others to lead*, reward them and step back when it's the right time

THE PROJECT LEADER

makes things happen

likes when things are done properly

potential for turf wars with the socializer - requires self-awareness

The project leader tends to be the first follower. Her relationship with the Socializer is critical in the first months of the project

THE DOCUMENTALIST

takes notes / pictures / archives etc

understands the value of sharing digital information

needs to be especially aware of her own needs for recognition,
cause her role is the least visible

The documentalist is critical in the second phase (expansion phase) cause she's going to bring some formality and structure.

THE TROLL

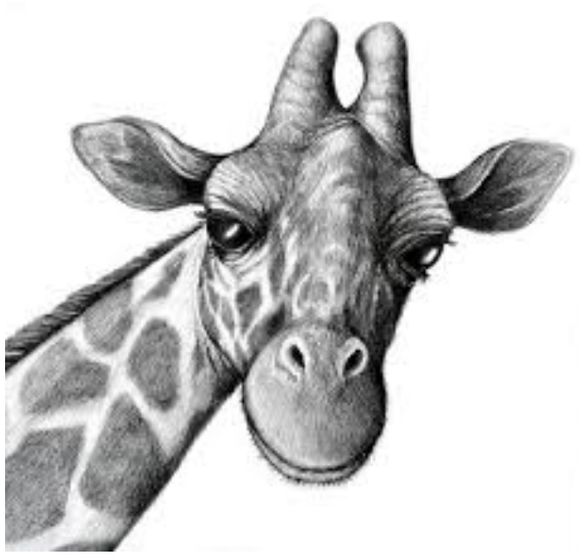

makes the elephant in the room visible

raises painful questions

needs to bring other value than only being a troll to get full recognition from the community

The troll is especially needed in the maturing phase, to make sure that the tribe keeps evolving and questioning itself

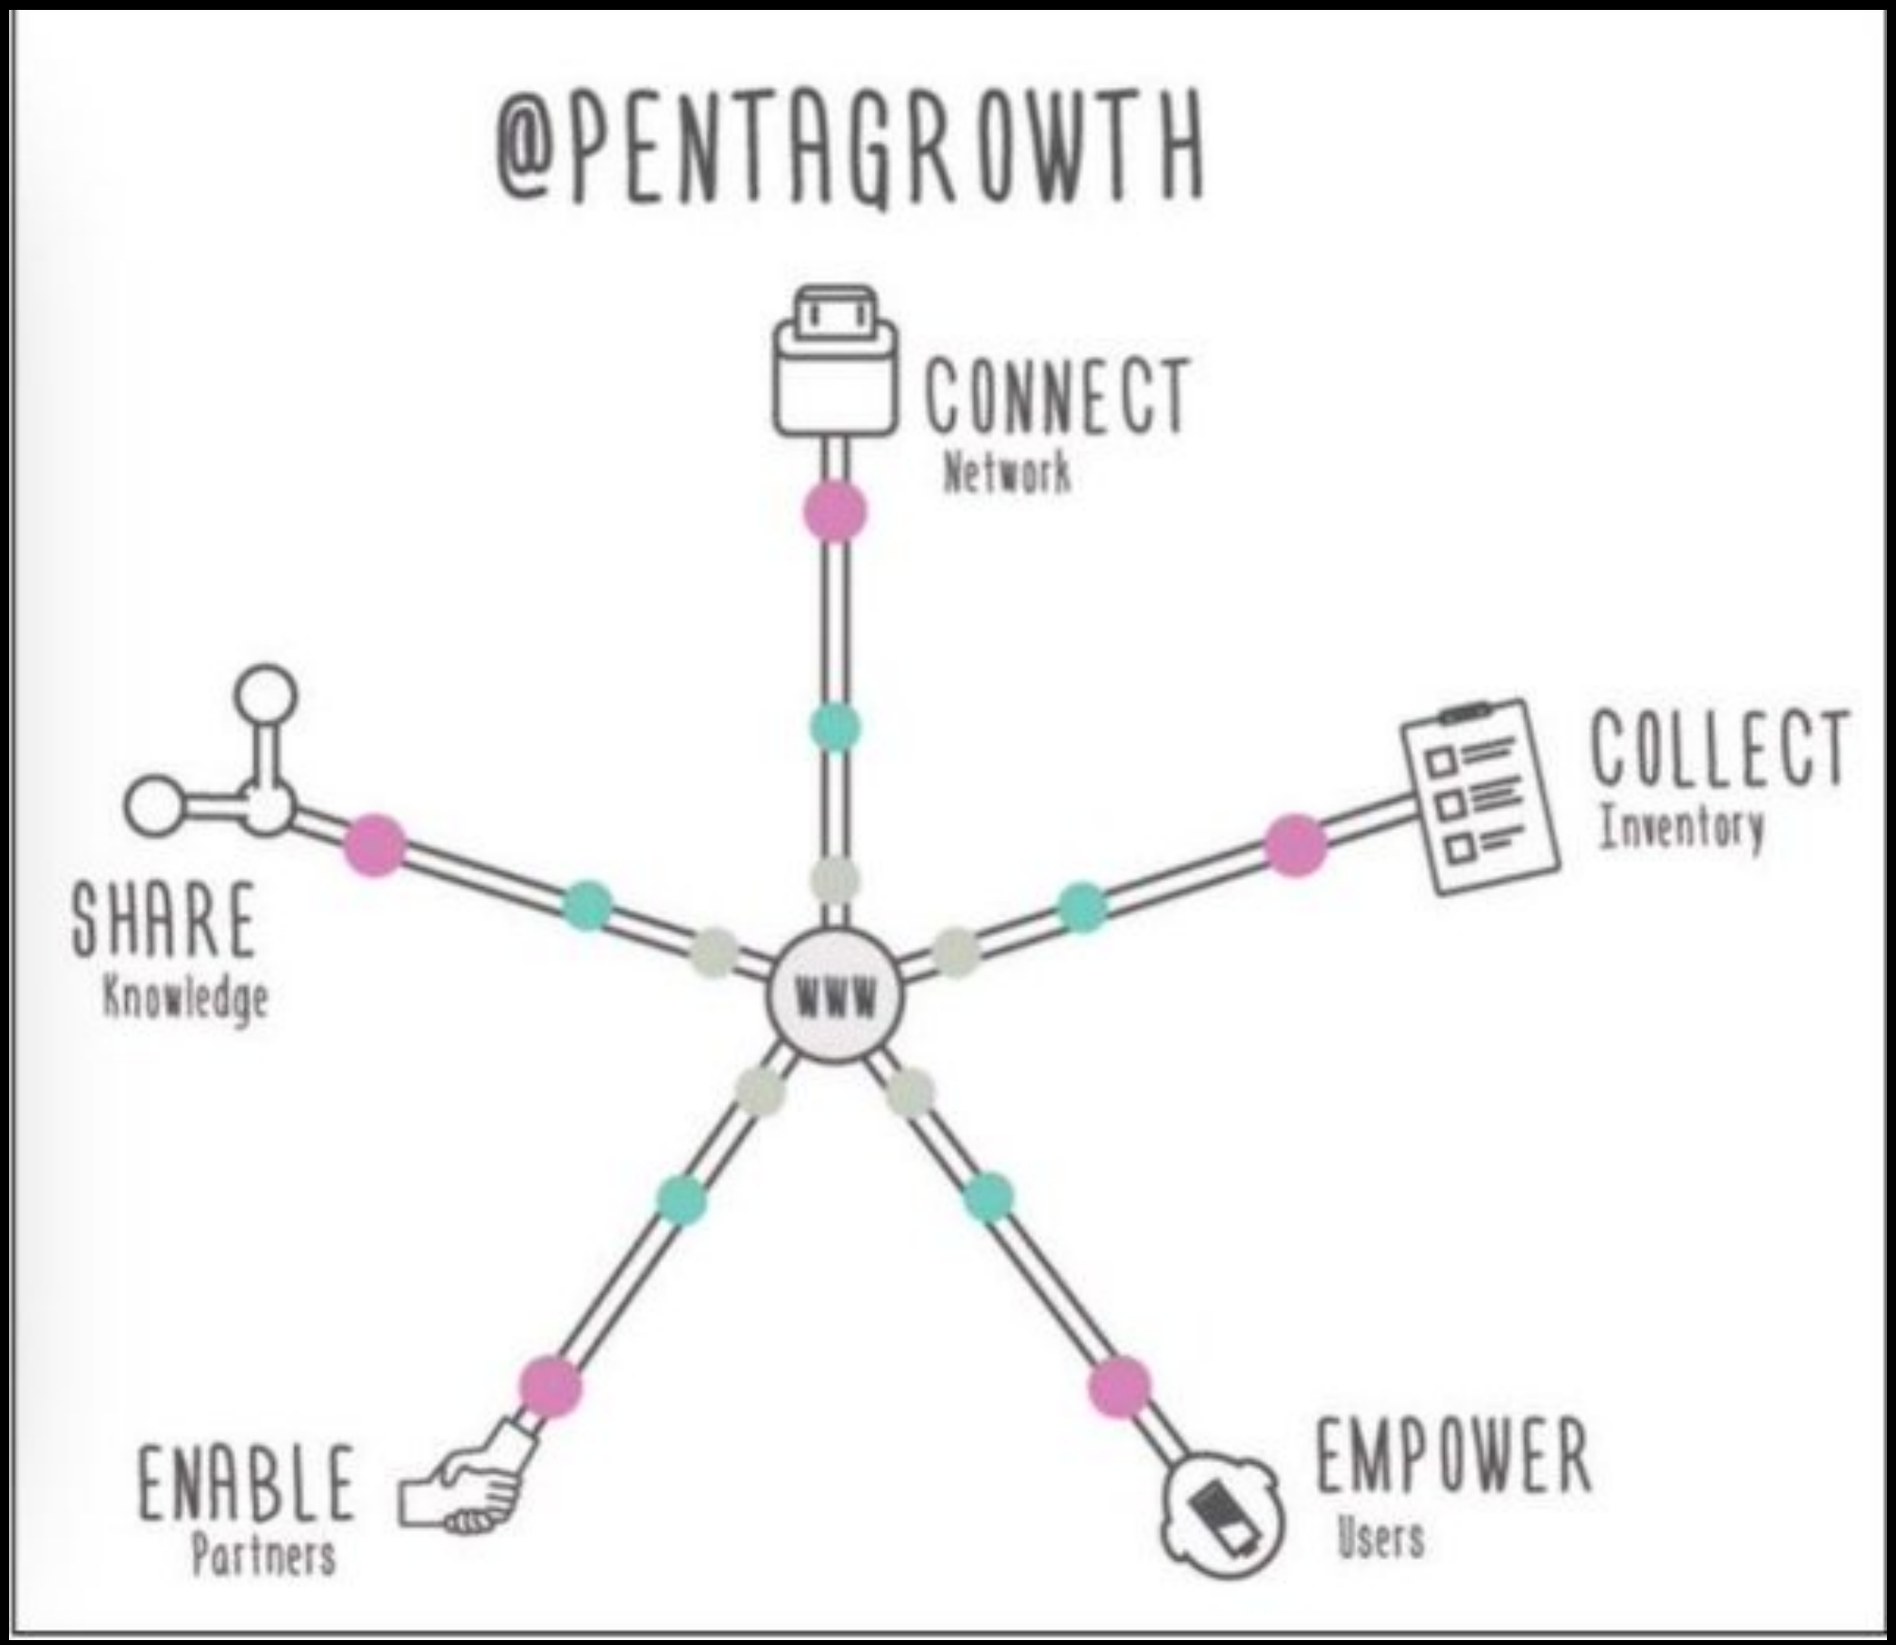

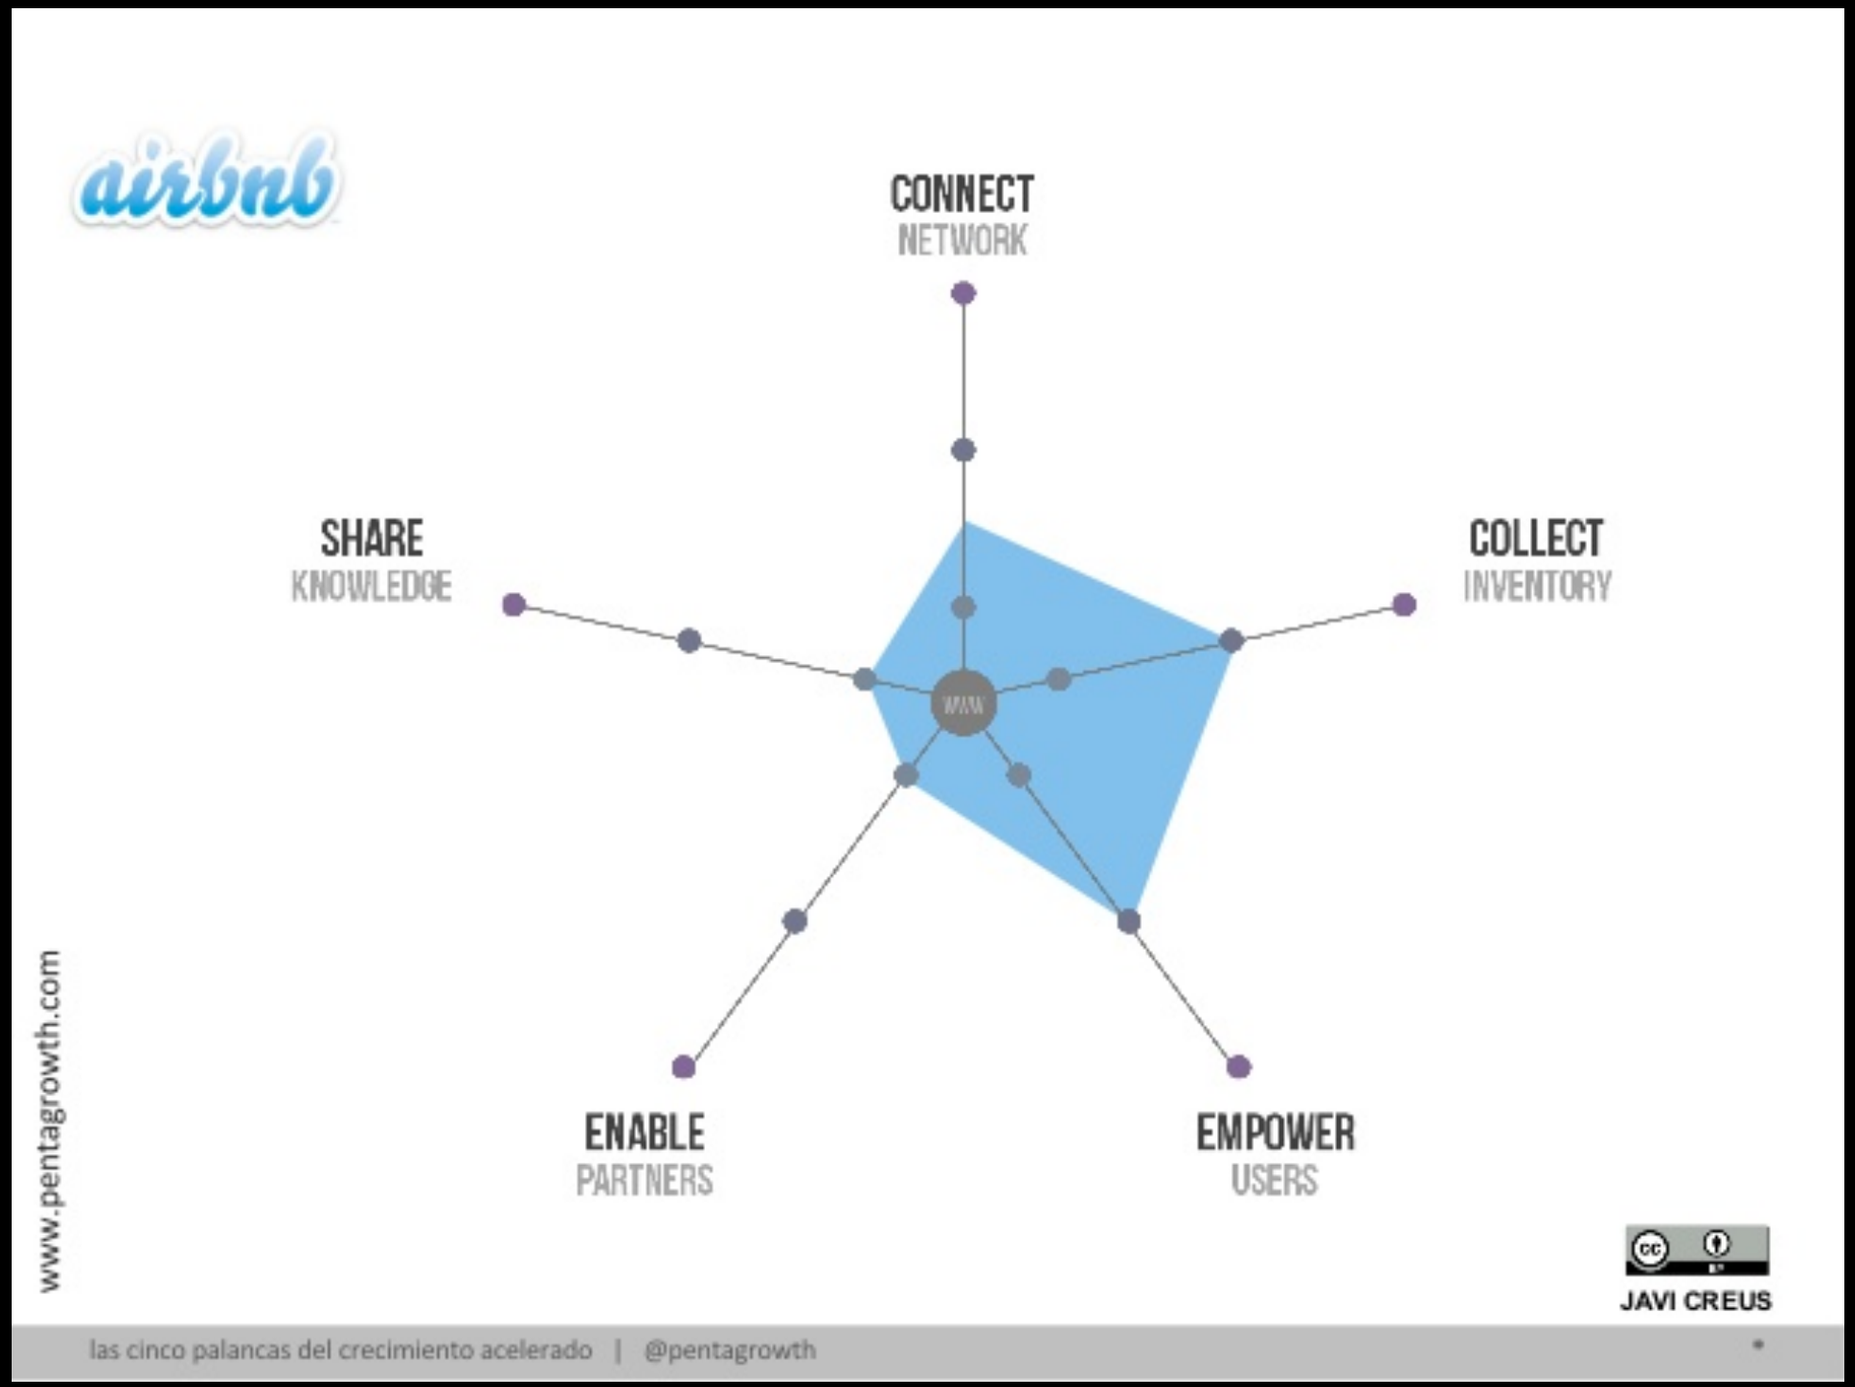

RABBIT, GIRAFFE, BEAR, TURTLE

Do you recognize your self in any of those roles?

What new roles do we see emerging within organizations?

NEO-TRIBE CREATION CANVAS

ORIGIN STORY & CREATION MYTH

BRAND / IDENTITY

SKILLS/ TALENTS TOOLS

SACRED VALUES & VIBE

KEY ACTIVITIES / IMPACT IN THE WORLD

MEMBERSHIP/ REWARDS & INCENTIVES

MARKET LANDSCAPE / COMPETITIVE ANALYSIS

AGREEMENTS & RULES

RITUALS AND BELIEF SYSTEMS

SLIDERS – WHAT TYPE OF BRAND?

Underground / stealth — Public / overt

Decentralized — Centralized

More open to external contribution — Less open to external contribution

Broad / Generalist — Specialized

Informal / casual — Formalized / Processes

Leaderless — Benevolent dictators

Spontaneous — Engineered

MACRO TRENDS OF NEO TRIBALISM

1. Unprecedented inequality in distribution of capital
2. Industrial standardisation of our surroundings and environment
3. Breakdown of social support systems and communities
4. Massive externalisation of environmental costs
5. Exponential diffusion of technological innovation

EMOTIONAL TRENDS OF NEO TRIBALISM

1. Crisis of meaning and failures of secularism
2. Burn-out & time poverty
3. Alienation & “zombification” - factoring out of emotional life
4. Disconnection from nature and human rhythms
5. Crisis of trust in institutions
    - Disenchantment with government and democratic process
    - Incapacity for agency within bureaucracies

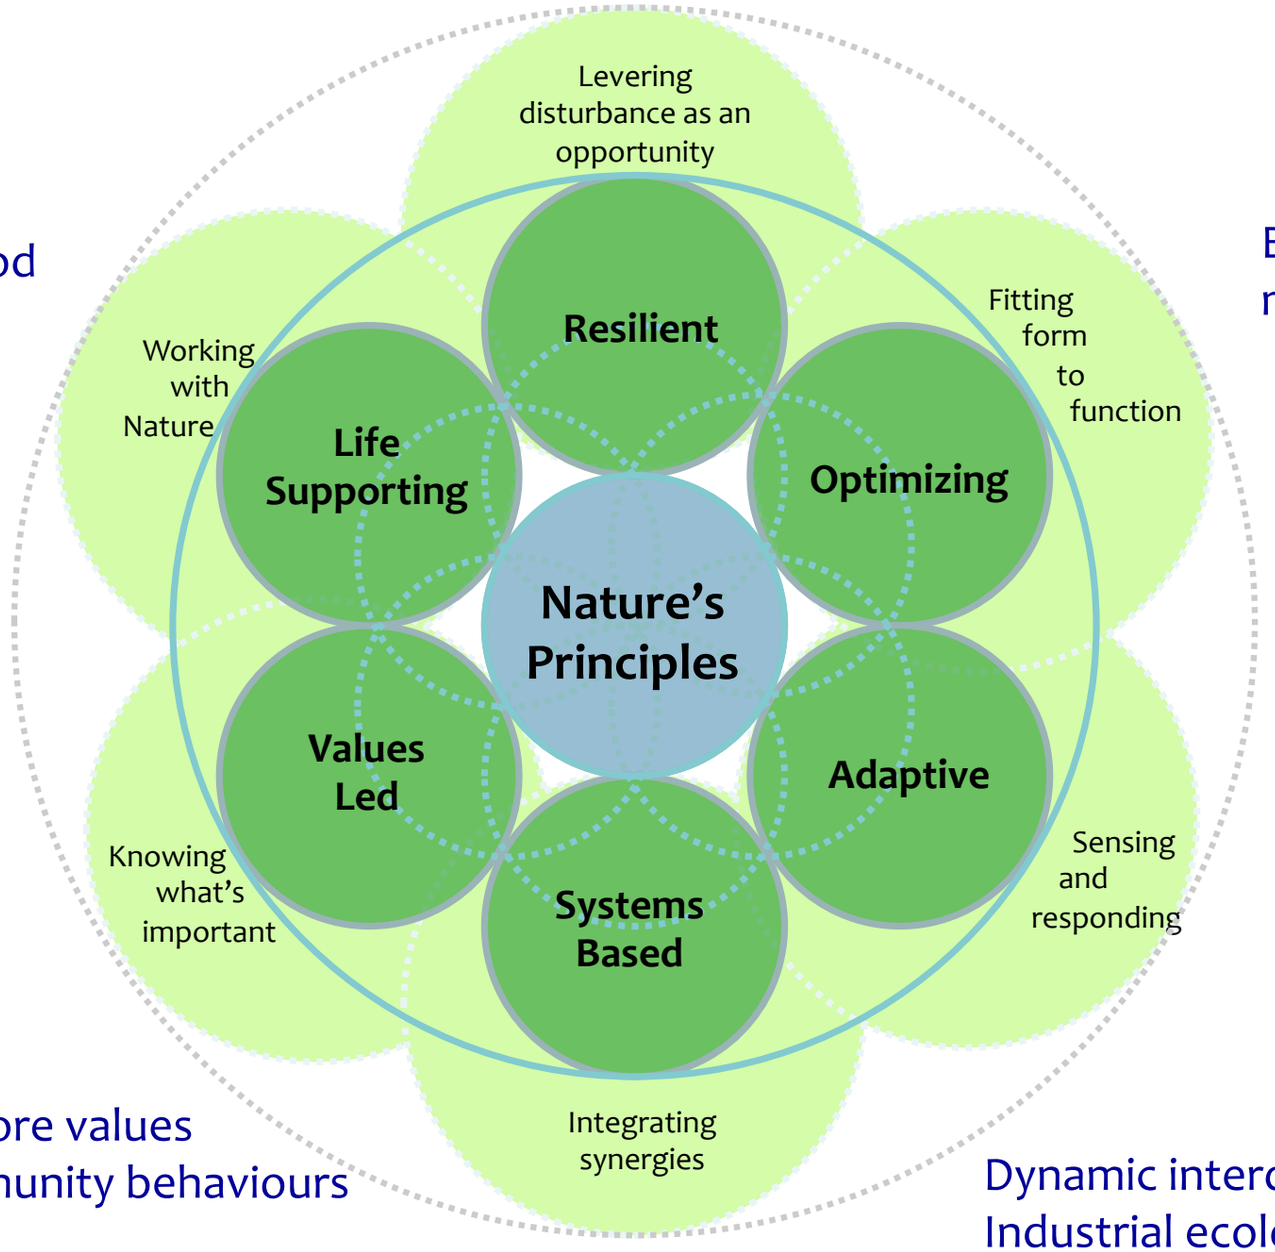

BUSINESS DRIVERS OF NEO TRIBALISM

1. Distributed Organizations
2. Participatory Governance
3. B Corp Movement
4. Circular Economy
5. Platform-based business models & Collaborative Economy

ECONOMIA CIRCULAR

Clique aqui para ver o vídeo

DECLARAÇÃO DE INTERDEPENDÊNCIA

Nós idealizamos um novo setor da economia,

que usa o poder do setor privado para criar benefícios para as pessoas e para o ambiente. Um setor formado por um novo tipo de empresa - Empresa B - guiado por um propósito de bem comum, que gera benefícios para todos os envolvidos, e não apenas para seus acionistas. Como membros deste setor emergente, como empresários e investidores de Empresas B;

Consideramos que estas são verdades evidentes;
Que devemos ser a mudança que buscamos no mundo;
Que qualquer negócio deve ser conduzido como se as pessoas e o meio ambiente importassem;
Que, através de seus produtos, práticas e lucros, as empresas devem procurar beneficiar a todos, sem provocar danos;

Fazer isso nos obriga a comportar-se de acordo com a ideia de que dependemos uns dos outros e, como resultado, somos responsáveis por nós mesmos e futuras gerações.

DEVEMOS **SER A MUDANÇA** QUE QUEREMOS VER NO MUNDO.

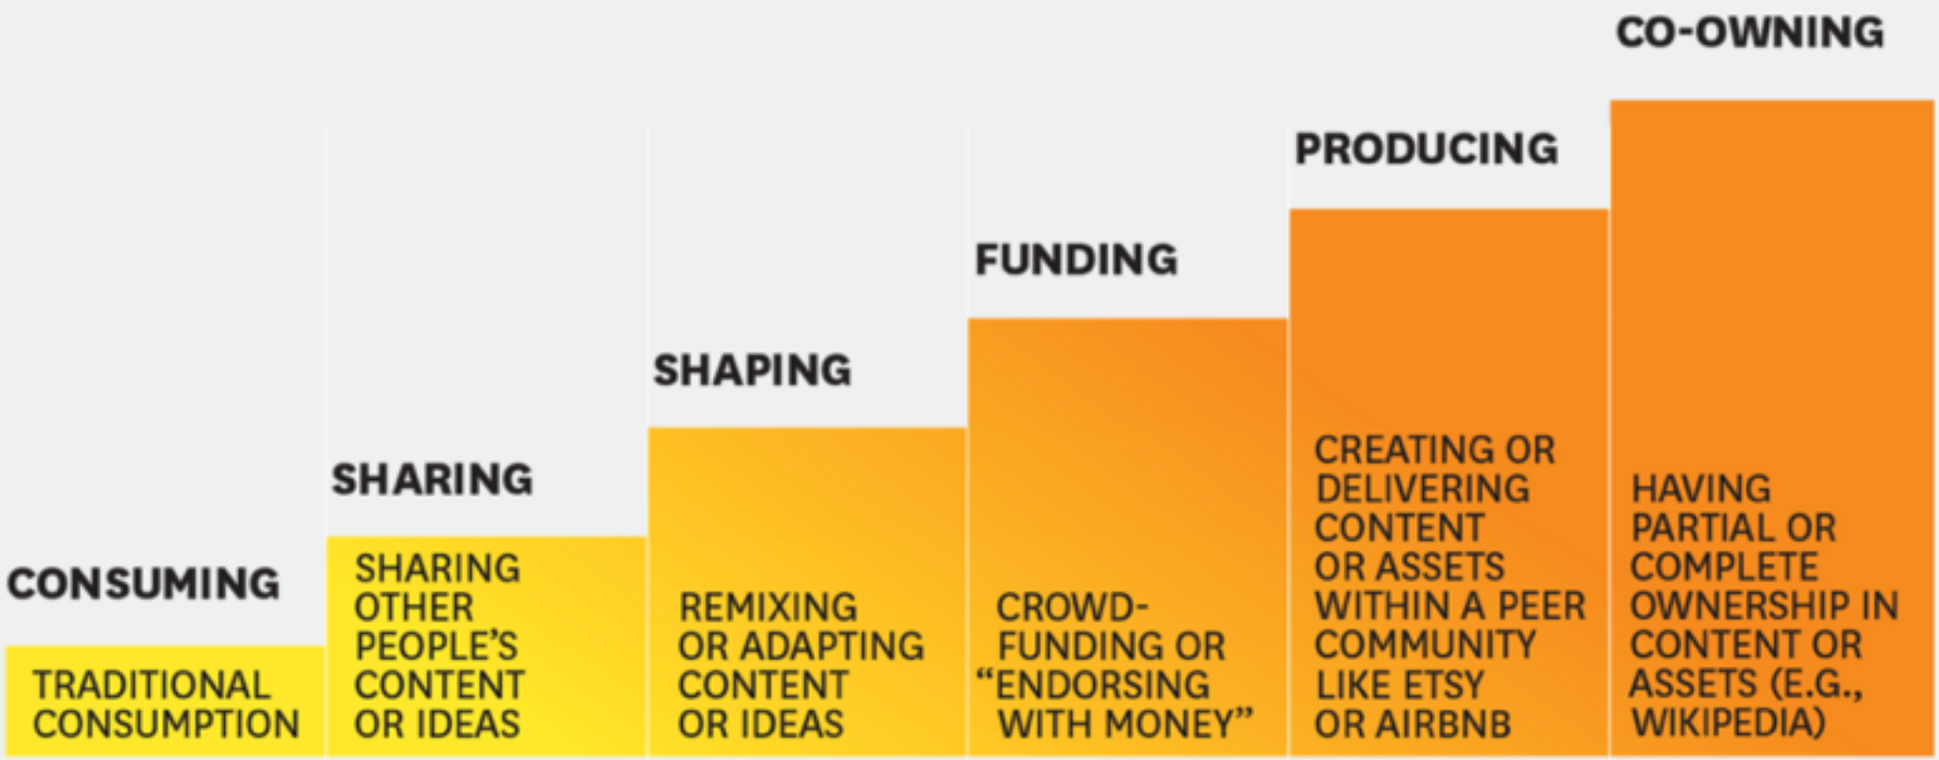

TODOS OS NEGÓCIOS DEVEM SER CONDUZIDOS COMO SE **"AS PESSOAS E A NATUREZA IMPORTASSEM"**.

PARA REALIZAR ISTO, DEVEMOS AGIR COM O ENTENDIMENTO DE QUE SOMOS DEPENDENTES UM DO OUTRO E POR ISSO **RESPONSÁVEIS UM PELO OUTRO**.
